MEMBERSHIP INFORMATION

Send \$20 annual membership dues to
ROBYNNE SCHOENBAUER, MSA Secretary/Treasurer

17173 158th St.
Hamburg MN 55339
952-237-5452

include your name, farm name,
address, phone, e-mail, website,
and social media links

Terms of the sale are cash or check. No credit cards.

Settlement must be made with the clerk immediately following the sale and before the cattle are removed. Purchasers or their representatives must sign the bill of sale prior to leaving the sale facility. Cattle leaving MN require a health certificate which will be provided by the designated sale vet. All animals sell under the ASA Standard Breeding Guarantee. Each lot will be sold to the highest bidder. Disputes are settled by the auctioneer. Changes of information will be announced from the auction block and shall take precedence over any printed material.

Purchaser's Risk: Each animal becomes the property of the buyer as soon as sold. Animals will be cared for by the seller until the sale ends. Neither the owners, employees, auctioneer, sale management, nor other affiliated persons can be held responsible for any accidents, but every effort will be made to provide safety and comfort for the cattle and all persons attending the sale.

Purebred. Selling 4 IVF reverse sorted Female embryos. Guarantee 1 preg at 90 days if implanted by a certified technician.

These embryos were made with FSH through Trans Ova. Embryos are housed at both the Farm or at Trans Ova Iowa. These embryos are full sibs to SCO Missing Mirage 222K ET. Red Reward semen is almost impossible to find nowadays, let alone sexed heifer embryos sired by him. Find some good receipts to stick these into and sit back and wait. The fun will start when you get some of these roan beauties of your own! This is a new mating and 222K is the first one to hit the ground, her mom is a big egg producer and I expect a lot more noise to be made from this combo in the future.

Purebred. Perhaps your first opportunity to get a heifer sired by the Champion Bull and Supreme Champion Shorthorn at Louisville this past November. The Royal Ruby 791 cow was a Division Champion at MN State Fair in 2018 and 2019. We sold two daughters in last year's Red White & Roan Spring Fling Sale going to Texas and Oklahoma and we have more heifer calves coming. The Royal Ruby cow family has been churning out the good ones for years and this mating has us really excited!

Collected by Diamond K Genetics & Trans Ova. Guarantee 1 pregnancy at 90 days if implanted by a certified technician.

Scurred. Purebred. A dark red, very balanced bull. Big hiped and heavy muscled. He's well structured and has got a solid foot underneath him. Well mannered. Comes from a lineage of bull producing females. Grand Dam is HSF Creole Belle 1058, dam of the top selling bull, OFS Red Cowboy, in the 2017 MN Shorthorn Sale. Broke to tie and lead.

Polled. Purebred. This Deliverance son is one we've been excited about since he was born. We love his length and extension and love him just as much when you view him from behind with his added top shape and dimension. He is just as intriguing on paper with a pedigree containing well known blood lines from Creole, Sonny, Jazz and Ripper just to name a few. Suitable for heifers.

Scurred. Purebred. Oh Taxi, where do we start.... we feel very strongly about this bull's future and the impact he will have on any program. Study the pedigree on this guy stemming straight from Worldwide, a bull whose semen is limited and one of our best females sired by BSG Energy. As an individual he performed well, and spot on with his phenotype, awesome look, neat design, structure and pedigree. Taxi has already been on the tanbark. No matter what you want to do with this bull, whether you run the tanbark or the green pastures, you are going to appreciate the outcome!

Polled. Purebred. Detonator is a moderate framed, heavy muscled coming 2 year old that could breed cows or heifers. Power and performance are stacked in his pedigree. Going back to Saskvalley Banjo and sired by our herd sire, DMCC Dynamite, a Muridale Thermal Energy son. Detonator's paternal sisters are starting to come into production and they are thick, moderate and easy keeping.

Polled. Purebred. This fella has been a standout since the day he was born. His sire, Thermal Energy, has been producing great cattle across North America and his dam, Penny 62D, is an ideal cow that hasn't missed. 52H's first calf crop exceeded our expectations and we're anxiously awaiting crop #2 in 2023. This guys got a set of numbers that don't have much room for improvement, take a look at the bull himself and you'll like him even more. All the prep work is done here, so buy with confidence and let him get to work! Trich tested clean.

ADS Thermal Energy D52H

Crooked Post Lass 44W

Polled. Purebred. A very stylish, sound and eye-catching heifer. The Lassie cows from Crooked Post are very productive with lots of milk and growth. Gallant did a great job passing on his stylish front-end and sound feet and legs. This heifer has the pedigree to perform and raise fancy show calves for many years, while still being a complete outcross to all the popular modern show bulls. Her granddam has raised ten calves with an average calving interval of 370 days, and her dam has settled during her first cycle every year. EPDs in the top 10% for WW, YW, Milk, and top 5% Total Maternal. CHV

Polled. Purebred. The Missing Mirages have been highlighting Schrag's sales for years and this one is worthy of her name, only difference is, she sells in MN! 222K is long fronted, big bellied, and as hairy as a yak! If you haven't had the excitement of dragging a roan power heifer into a show ring, here's your chance. It's a lot of fun to be on the halter of a female that turns heads and grabs attention like she does. Not to mention she is out of Sull Red Reward 9321, whose semen is very hard to find. This heifer is ready to compete right now, she is on track for Junior Nationals and after that we would love to see her taken to MN State Fair and Louisville. She's gonna be very competitive in the show ring, but it's in the donor pen that we really expect her to dominate. We would like to retain the rights to 1 IVF flush (minimum 6 freezable embryos) at our expense and the new owner's convenience. We would also consider splitting 2 IVF cycles and expenses instead of just doing one on our own. In that case, we would open up our semen inventory and be willing to share some of our harder to find semen (Worldwide, 1872, Payweight, Perfection, etc.) CHV

Polled. Purebred. After much discussion in our household, we have decided to offer this fancy red heifer. She struts her stuff with all the right qualities to stand up in the show ring as well as having a bright future in her producing outstanding calves for you. Her dam, from the Augusta Pride cow family has been consistently having heifers that top our pens for years. Watch our Facebook page for updated photos. CHV

Polled. ShorthornPLUS (50%). If you're looking for a long necked big bellied heifer then you found her in Victoria K11. Not only is she strutting around in a structurally correct package but she's from one of the most productive cow families in my herd. She might be out of a first calf heifer but her granddam is a JPJ daughter that's still cranking them out at 10 years old and K11 looks to be walking in her granddam's hoof prints as she had her first cycle in late December. Bid with confidence on an animal with look and staying power, and take this May baby home. CHV

Polled. Purebred. Mango is a hard one to let go, but we wanted to bring one of the best. The cow power and breeding potential behind this female is second to none. Study her from the ground up, the foot design, amount bone she sets down on. This one can walk with the best of them. Mango has all the pieces to play as a show heifer, with a powerful build, good in her angles, along with an unprecedented amount of capacity. This leads us to believe she will raise some elite progeny....and did we mention she is kid broke! CHV

Polled. Purebred. The Polly cow family has been our best producing family. Lexi is our only daughter out of the original CYT Polly as her daughters are the first ones that catches people's attention. The females are moderate framed, easy keeping females that make excellent mommas. This heifer is hard to let go of since the original is getting up in age and we don't have any other daughters. Her sire is a son of LCC Weston Mary BDJ 1423, who is the dam of KSS Aviator's Weston Mary 2038ET, who sold for \$24,000 at the 2022 Fall Great Shorthorn Revival. This heifer has the potential to be just as good! We loved this New Year's heifer from the moment she was born and she just keeps getting better and better. Lexi's Polly has it all, length, body, femininity and a great disposition. Watch out for this heifer! For more information check out our Facebook page: @braecofarm CHV

Polled. Purebred. This fall born heifer has been a popular heifer as soon as she was born. She has received numerous likes and keeps getting better. The Mona Lisa cow family has been a popular one and this heifer definitely keeps up the family name. BRC-C Hector's Mona Lisa isn't going to be a large cow but she will definitely be one who produces top notch animals. Her sire has been a really good herd bull for us. He produces really low birth weights as his calves average 66 pounds. She has a wonderful temperament and personality. This heifer is green but she has great structure, length and has a clean, feminine front end. For more information check out our Facebook page: @braecofarm CHV

Polled. Purebred. The Rosewood cow family has been real easy keeping cows for us. Their mother is a coming 9 year old that raises a nice calf every year except the last year where she raised a nice pair of twins. Their grandmother brought in a nice calf as a 12 year old cow. Having longevity and being easy keeping its hard to go wrong Confirmed AI bred to the calving ease specialist JSF Goldenrod 57U, due April 3rd. CHV

Bred on June 25 to JSF Goldenrod 57U (*x4142922). Exposed from July 2 to September 17 to Homedale Hobby (x4332977).

Stayability	16	SF	48.76

Polled. Purebred. A very easy-keeping, sound cow built for longevity. She maintains her condition year-round and has a great udder. She's a strong candidate for a foundation cow, and based on an observed breeding date of 8/15/2022, she should have a calving interval under 365 days this year. She is a very docile cow that often leads our herd into the corral when we need to round them up. These mature cows are a great way to add proven genetics to your herd, and if we didn't have so many great Havelock heifers in our replacement pen (including her daughter), this gal wouldn't be leaving. Not CHV

Observed breeding on August 15. Exposed from July 24 through Nov 9 to KNUT Juggernaut (*x4326555). Approximately 3 months pregnant on November 23 by vet ultrasound.

Polled. Purebred. This one took some convincing to get Dad to sell her. Big Sky X Emma Ann. He never wants to sell an Emma or a Big Sky. Will calve by sale day to PVF Fierce and bull or heifer calf is sure to be a pay day! CHV

Bred to PVF Fierce 75F (*x4268491). Due on 1/29/2023.
